KRUPP MATERIALS HANDLING – THE MINING PARTNER

Krupp Materials Handling (KMH) is a leading supplier of mining and materials handling plant, equipment and systems for open pit mining, bulk materials handling and minerals processing in South and Southern African industry.

With more over a century's leading edge technology and proven quality, KMH is entrenched as a supplier of engineered systems and equipment to Southern African industries and mines. The company is capable of designing and installing multi-disciplinary contracts on a turn-key or partial basis, from conceptual planning and budget stages through to design, installation and commissioning.

Equipment is selected from an extensive internal standard range as well as from external sources to ensure optimum performance at minimum cost, backed by professional comprehensive service. Complete tailor made operating systems are designed by Krupp's multi-disciplined local team of engineers, backed by technology from ThyssenKrupp Germany.

The company's range of open pit mining equipment and techniques are universal, comprehensive and unique.

KMH has become a leading partner for open pit mining operations world wide with their combination of machines, expertise and know-how.

The product range includes

- Mobile in-pit crushers
- Semi-mobile crushers
- Bucket wheel excavators
- Crawler-mounted spreaders
- Shiftable conveyors

The Krupp group has been represented in South Africa since 1896 and the foundation for KMH's continued success, optimum performance and comprehensive and superior quality range of products is based on over a century's specialised experience, research and development, service excellence and comprehensive know-how.

The company applies state-of-the-art internationally acclaimed technology and world-wide know-how to offer design systems to meet unique application demands. Strong local design capability, specialised knowledge of the local environment, market conditions and customer requirements as well as close co-operation with customers ensure turnkey solutions for all applications. This is backed by centres of excellence in Germany, Canada, Australia, USA and South Africa.

In addition, equipment is available from a comprehensive standard range to ensure optimum performance at minimum cost and easy replacement of spare parts.

Component and system availability is guaranteed through equipment upgrade contracts with the Krupp quality standards, spare and wear parts as well as regular inspections by experienced service personnel. Product Support Services include equipment status reports, maintenance programmes, conditioning monitoring, engineering support, shutdown planning, etc.
